Retrieve Fees Payment Details

Description:

As a logged-on user/teller I should be able to retrieve the student details and destination account when I enter the student ID and select the type of fees being paid.

Acceptance Criteria:

When the user/teller enters the student id and fees type, the student details and destination account should be displayed. (The student details are yet to be provided by the bank but I assume it should have First Name, Last Name at least)****

Display the Payment Details

Description:

As a logged-on user/teller I want to be able to see the payment details displayed with the prepopulated destination accounts so that I can include other relevant information (Payer's name and Phone Number) required.

Acceptance Criteria:

When the payment type is selected, the payment details page should be displayed for the teller to proceed with the transaction processing.

o Scenario 2:

Given that the payment type doesn't exist, the error should be displayed to notify the teller.

Posting the Fees Payment

Description:

As a logged-on user/teller I want to be able to click on the posting and initiate the transaction and send the relevant details (the student ID, Fee type, amount, ref no, payer name and payer phone) through the web service.

Acceptance Criteria:

If successful, the payment is processed and consummated with relevant accounting entries passed. The teller should be able to confirm that the posting was successful with appropriate messages displayed on the status.

o Scenario 2:

If unsuccessful, the teller should be able to retry the button to initiate the posting again.

Print Receipts

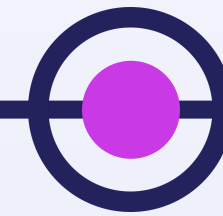

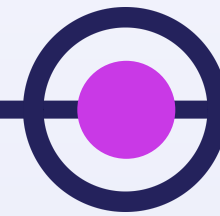

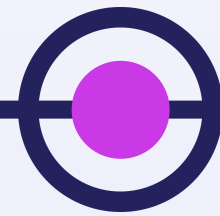

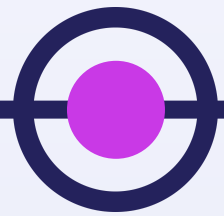

Description:

As a logged-on user/teller I want to be able to print the receipts for customer acknowledgment.

Acceptance Criteria:

When I click on the print button after a successful transaction, the receipt should be available for printing in pdf format when sent to the printer.

Accessing the Application Pin Sales Platform

Description:

As a logged-on user/teller, I want to be able to access the EBK Application Pin Sale menu in Renda.

Acceptance Criteria:

When I click on the access menu, I should see the landing page so I can proceed to perform the purchase process.

Get Pin Category

Description:

As a logged on user/teller I want to be able to click on the GetPINCategory button to see all the application Pins available for sale to the applicants.

Acceptance Criteria:

When the GetPINCategory button is clicked, I should be able to see and select the desired Pin type along with the relevant information (program type, amount, and destination account) to process for the applicant

- Scenario 2:
- If the pin type/category is not available, the teller should not be able to proceed with the sale/transaction.

Display the Application Pin Payment Details

Description:

As a logged-on user/teller I want to be able to see the payment details for the application pin displayed with the pre-populated amount and CR/Destination account so that I can include other relevant information (Applicant's name, Phone Number and, Email) required.

Acceptance Criteria:

When the pin type is selected, the payment details page should be displayed for the teller to proceed and process the Pin transaction.

Display the Application Pin

Payment Details

Description:

As a logged-on user/teller I want to be able to click on the posting button and initiate the transaction and send the relevant details (reference no, transaction date, amount, cr account no, applicant's name, phone no, and email) through the web service.

Acceptance Criteria:

If successful, the payment is processed and consummated with relevant accounting entries passed. The teller should be able to confirm that the posting was successful with appropriate messages displayed on the status.

o Scenario 2:

If unsuccessful, the teller should be able to retry the button to initiate the posting again.

Pin Category

Description:

As a logged-on user/teller I want to be able to print the PIN for the applicant.

Acceptance Criteria:

When I click on the print button after a successful transaction, the pin should be available for printing in pdf format when sent to the printer.
